Faraday Future Global President, Jerry Wang, will participate in the Cantor Global Technology & Industrial Growth Conference, taking place March 10 and 11, 2026, in New York City.

office locations worldwide.

The NYC conference on March 10-11 brings together the most forward-looking thought leaders from public and private companies to explore the disruptive forces reshaping the future of technology and industrial innovation. Attendees will have access to in-depth insights through fireside chats, panel discussions, and presentations highlighting the trends driving global growth.

Jerry Wang will be participating in meetings with attendees and investors and discussing the Company's strategic roadmap and key developments related to the FX Super One and the Company's inaugural embodied AI robotics products.

"We look forward to engaging with the many influential attendees at Cantor's Global Technology & Industrial Growth Conference," said Jerry Wang. "The conference provides an opportunity for FF to share our latest updates on our new initiatives, execution priorities, and latest progress across our AI-driven mobility and robotics businesses."

FF's participation in Cantor's conference reflects the Company's continued engagement with the investment community and its commitment to transparent communication and long-term value creation.

Company presentation materials will be posted to FF's website in the IR section under the *Events and Presentations* section.

ABOUT FARADAY FUTURE

Faraday Future is a California-based global intelligent Company founded in 2014 and is dedicated to reshaping the future of mobility through vehicle electrification, intelligent technologies, and AI innovation. Its flagship vehicle, the FF 91, began deliveries in 2023 and reflects the brand's pursuit of ultra-luxury, cutting-edge technology, and high performance. FF's second brand, FX, targets the high-volume mainstream vehicle market. Its first model, Super One, is positioned as a first-class EAI-MPV, with deliveries planned to begin in 2026. FF recently announced its entry into the Embodied AI Robotics business with sales beginning this year, connecting its future strategy of bringing a new era of EAI vehicles and EAI robotics.
