Faraday Future Global President, Jerry Wang, will be attending the 38th Annual Roth Conference, taking place in Southern California March 22–24, 2026.

Faraday Future will showcase its cutting-edge electric vehicles and next-generation robotics technologies. Attendees will have the opportunity to experience the Company's flagship vehicles firsthand, along with select AI-driven robotic systems that highlight FFAI's broader vision for intelligent mobility and automation.

Senior members of Faraday Future's management team will be available for one-on-one meetings with institutional investors, analysts, and strategic partners throughout the conference.

"We are excited to participate in this year's Roth Conference and engage with the investment community," said Jerry Wang. "This event provides a valuable platform to demonstrate our innovative technology, including our intelligent EVs and robotics initiatives, as we continue to redefine the future of mobility."

The Roth Conference is one of the premier gatherings for institutional investors, bringing together executives from a wide range of growth companies across multiple sectors.

More information on the conference can be found here: https://www.meetmax.com/sched/event_127123/_co-list_cp.html

FF's participation in Roth's conference reflects the Company's continued engagement with the investment community and its commitment to transparent communication and long-term value creation.

ABOUT FARADAY FUTURE

Faraday Future is a California-based global intelligent Company founded in 2014 and is dedicated to reshaping the future of mobility through vehicle electrification, intelligent technologies, and AI innovation. Its flagship vehicle, the FF 91, began deliveries in 2023 and reflects the brand's pursuit of ultra-luxury, cutting-edge technology, and high performance. FF's second brand, FX, targets the high-volume mainstream vehicle market. Its first model, Super One, is positioned as a first-class EAI-MPV, with deliveries planned to begin in 2026. FF recently announced its entry into the Embodied AI Robotics business with sales beginning this year, connecting its future strategy of bringing a new era of EAI vehicles and EAI robotics.
