

Faraday Future Founder and Co-CEO YT Jia Gives Latest Progress of the Company's EAI Robotics Education Product Line and Education System

Apr 22, 2026

- FF is the first company globally to propose that the first breakout point for the consumer-facing EAI robotics market will be the home education sector. As one of the first U.S. companies to deliver humanoid and bionic robots, FF is fully committed to driving the large-scale adoption of humanoid and bionic robots in the education market, with the goal of making 2026 the inaugural year of EAI robotics in education.

LOS ANGELES--(BUSINESS WIRE)--Apr. 22, 2026-- Faraday Future Intelligent Electric Inc. (NASDAQ: FFAI) ("Faraday Future", "FF" or the "Company"), a California-based global Embodied AI (EAI) ecosystem company, today shared a weekly business update from YT Jia, Founder and Global Co-CEO of FF.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20260422700469/en/>

Faraday Future Founder and Co-CEO YT Jia Gives Latest Progress of the Company's EAI Robotics Education Product Line and Education System

"In last week's report, I mentioned that this week we would release an additional special update focused on the latest progress of the EAI robotics education product line and the education system. But before that, let me first share some exciting

news about FFAI today. Yesterday, FFAI shares closed up 85.55%, reached an intraday gain of as much as 107.26%, and generated more than \$272 million in daily trading volume. This has added an especially celebratory vibe to today's update.

FF is the first company globally to propose that the first breakout point for the consumer-facing EAI robotics market will be the home education sector. As one of the first U.S. companies to deliver humanoid and bionic robots, FF is fully committed to driving the large-scale adoption of humanoid and bionic robots in the education market, with the goal of making 2026 the inaugural year of EAI robotics in education.

As pioneers and trailblazers in EAI robotics education, we are moving aggressively to build an EAI education ecosystem that serves both the B2C consumer market—including family education, companionship, and child development—and the B2B institutional education market. We aim to become an industry leader by 2026, with a particular focus on attracting "digital natives" of the AI era to join our developer community and to systematically reshape the value structure of AI education. Let me now share several important milestones we have recently achieved in this area.

1. The receipt of a recent funding of \$45 million from a mid-to-large U.S. institutional investor further validates confidence in our robotics strategy and gives us even greater conviction to accelerate its full-scale execution.
2. California State Treasurer Fiona Ma, El Segundo Mayor Chris Pimentel, where FF's Silicon Beach headquarters is located, and leaders from the Lynwood Unified School District in Los Angeles jointly unveiled the California EAI Robotics Education and Innovation Lab. This high-profile unveiling reflects strong recognition of FF's education strategy and highlights the accelerating ecosystem synergy forming among government authorities, educational institutions, and industry partners around FF's education initiative.
3. FF has officially signed a strategic partnership agreement with Triple I, an education institution with a full-cycle education planning model, marking the official launch of our collaboration in EAI education. We will also jointly bring an EAI Robotics summer camp. This marks a new milestone in the scaled rollout of both B2B and B2C use cases under "Robot & Vehicle + Education".

FF has a unique set of systematic advantages in this space. First, we have a clear first-mover advantage. We are the first U.S. company to deliver both humanoid and bionic robots, while also moving decisively into the education market. Second, our Three-in-One evolving flywheel of "Device-Brain-Data" is gaining speed. Large-scale deployment in education will make this flywheel even stronger. Third, we have a strong supply chain and compliance advantages. Our ability to integrate supply chain resources across the world, especially between China and the U.S., together with our ability to build and operate within a U.S. compliance framework, gives us a unique competitive moat. Fourth, we have strong capabilities in building a user ecosystem. Fifth, we are receiving strong recognition and active support at the government level. Sixth, we are also seeing strong support and mutual empowerment from our education partners.

With the combined strength of these six advantages, we are fully confident in our ability to make 2026 the inaugural year of EAI robotics education. The rapid progress of this strategy is also closely tied to our recent organizational transformation. In EAI robotics education, we have officially established an Education Ecosystem Product Line, which will take full responsibility for product development, ecosystem building, and large-scale rollout of our education system. We will continue to keep everyone posted on the planning and progress of our education product eco-strategy in a timely manner.

Last week, core founding members joined the Board of Directors. This is a major enhancement to our corporate governance and also reflects the continued return of the core founding team. Next, subject to Board approval, we will announce further changes in management. Please stay tuned.

Thank you all!"

ABOUT FARADAY FUTURE

Faraday Future is a California-based global intelligent Company founded in 2014 and is dedicated to reshaping the future of mobility through vehicle electrification, intelligent technologies, and AI innovation. Its flagship vehicle, the FF 91, began deliveries in 2023 and reflects the brand's pursuit of ultra-luxury, cutting-edge technology, and high performance. FF's second brand, FX, targets the high-volume mainstream vehicle market. Its first model, Super One, is positioned as a first-class EAI-MPV, with deliveries planned to begin in 2026. FF recently announced its entry into the Embodied AI Robotics business with sales beginning this year, connecting its future strategy of bringing a new era of EAI vehicles and EAI robotics. FORWARD LOOKING STATEMENTS

This press release includes "forward looking statements" within the meaning of the safe harbor provisions of the United States Private Securities Litigation Reform Act of 1995. When used in this press release, the words "plan to," "can," "will," "should," "future," "potential," and variations of these words or similar expressions (or the negative versions of such words or expressions) are intended to identify forward-looking statements. These forward-looking statements, which include statements regarding potential future legal actions against alleged illegal market manipulation or similar improper activities, and FF's entry into the embodied AI robotics market and robotics deliveries and development, involve a number of known and unknown risks, uncertainties, assumptions and other important factors, many of which are outside the Company's control, which could cause actual results or outcomes to differ materially from those discussed in the forward-looking statements.

Important factors, that may affect actual results or outcomes include, among others: the Company's ability to timely regain compliance with Nasdaq's minimum bid requirement; the Company's common stock will be suspended from trading on Nasdaq if its closing price is \$0.10 or less for 10 consecutive trading days; the Company's ability to continue as a going concern and improve its liquidity and financial position; the Company's ability to pay its outstanding obligations, which it currently lacks; the availability of sufficient share capital to meet its current obligations and execute on its strategy, which the Company currently lacks; the agreement of stockholders to substantially increase the Company's share capital, which could result in substantial additional dilution; the willingness of convertible debt investors to fund the Company while it lacks sufficient share capital for conversions; demand for the Company's robotics products; the ability of B2B preorder companies to locate customers to purchase our robotics products, on which their nonbinding preorders substantially depend; competition in the robotics industry, which includes companies with far superior experience, funding and name recognition; the Company's reliance on a single OEM for most of its robotics products; the Company's ability to get the planned robotics products to comply with all applicable U.S. rules and regulations; the ability of the robotics OEM to timely supply robotics to the Company; tariff uncertainty for imported products, particularly from China; demand from automobile dealers for robotics products; the Company's ability to homologate FX vehicles for sale; the Company's ability to secure the necessary funding to execute on the FX strategy, which is substantial; the Company's ability to secure an occupancy certificate covering all of its Hanford facility; the Company's ability to remediate its material weaknesses in internal control over financial reporting and the risks related to the restatement of previously issued consolidated financial statements; the Company's limited operating history and the significant barriers to growth it faces; the Company's history of substantial losses and expectation of continued losses; the success of the Company's payroll expense reduction plan; the Company's ability to execute on its plans to develop and market its vehicles and the timing of these development programs; the Company's estimates of the size of the markets for its vehicles and cost to bring those vehicles to market; the rate and degree of market acceptance of the Company's vehicles; the Company's ability to cover future warranty claims; the success of other competing manufacturers; the performance and security of the Company's vehicles; current and potential litigation involving the Company; the Company's ability to receive funds from, satisfy the conditions precedent of and close on the various financings described elsewhere by the Company; the result of future financing efforts, the failure of any of which could result in the Company seeking protection under the Bankruptcy Code; the Company's indebtedness; the Company's ability to cover future warranty claims; the Company's ability to use its "at-the-market" program; insurance coverage; general economic and market conditions impacting demand for the Company's products; potential negative impacts of a reverse stock split; potential cost, headcount and salary reduction actions may not be sufficient or may not achieve their expected results; circumstances outside of the Company's control, such as natural disasters, climate change, health epidemics and pandemics, terrorist attacks, and civil unrest; risks related to the Company's operations in China; the success of the Company's remedial measures taken in response to the Special Committee findings; the Company's dependence on its suppliers and contract manufacturer; the Company's ability to develop and protect its technologies; the Company's ability to protect against cybersecurity risks; and the ability of the Company to attract and retain employees, any adverse developments in existing legal proceedings or the initiation of new legal proceedings, and volatility of the Company's stock price. You should carefully consider the foregoing factors and the other risks and uncertainties described in the "Risk Factors" section of the Company's Form 10-K filed with the SEC on March 31, 2025, and Form 10-Qs for the quarters ended June 30, 2025 and September 30, 2025 filed with the SEC on May 9, 2025, August 19, 2025 and November 21, 2025, respectively, and other documents filed by the Company from time to time with the SEC.
